

METALLISED BARRIER BAGS

A cheaper alternative to 100 microns (4mils) moisture barrier bags. These are durable, strong and lightweight with a metallised structure, 0.08mm thick - printed with moisture and ESD symbol. They meet the requirements of MIL-PRF-81075, EIS586, EIA54.

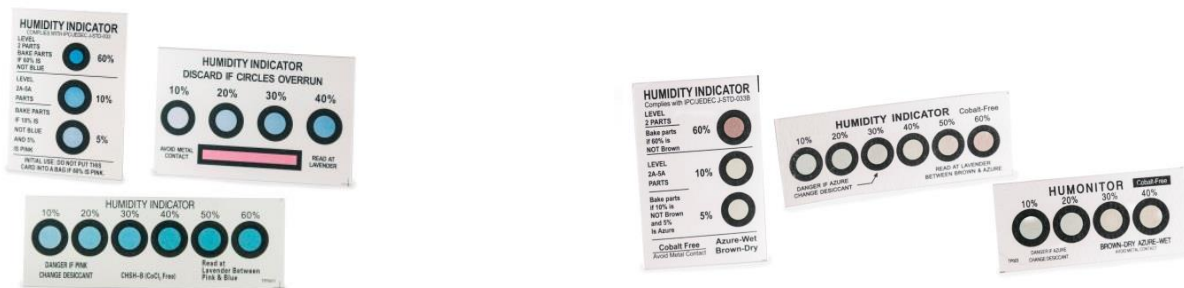

Supplied in packs of 100. For any other sizes and thicknesses, please contact us.
All standard sizes below are stocked items.
