17.09.2020**Important information about Fami Storage Products:**

On the 1st of April, Fami Srl's manufacturing structure changed, the plastic business split to only steel manufacture. Fami is now no longer a plastic box producer. The plastic box division was separated to partnering company Imilani.

Imilani have been involved in plastic production since 1995. This company transition means all of our conductive euro boxes, flat fronted picking bins, dividers and PCB racks are now Imilani manufactured. The products are exactly the same but are now branded Imilani with their new production part code instead of the Fami logo and production code.

Our Bondline part codes will remain the same.

These boxes are still manufactured to the highest quality in the Italian factory. Bondline remain the conductive UK distributor.

The ex Fami products remain on special offer.

Yours Sincerely,

Victoria Blizzard
Director
