

ESD Caution Sign

TECHNICAL DATASHEET

S315ENT

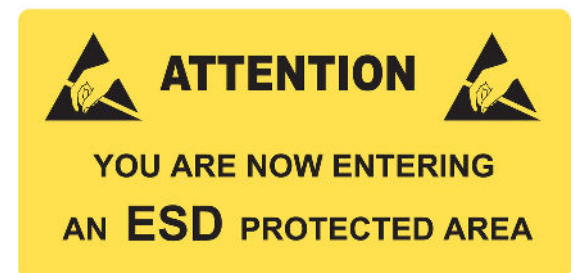

Description

Help workers stay informed of the static grounding policies at your facility with warning signs. This awareness sign is a simple yet an effective way of reminding everyone of the problems and related procedures required to help eliminate ESD. This sign measures 150 x 300mm and is available in yellow and black as standard. The sign features the ESD susceptible symbol which denotes components and sub-assemblies which are ESD susceptible.

These signs do not have any ESD properties and are therefore to be used outside of the EPA (EPA's entrance door, for example).

Features

- Help workers stay informed of the static grounding policies at your facility.
- Yellow background and black text as standard.
- Rigid, PVC plastic board material with self-adhesive backing.
- 300mm in diameter.
- Features ESD cautionary symbol.
- Multi-language and other colours available on request.
- RoHS and REACH compliant.

Text Reads

'ATTENTION. YOU ARE NOW ENTERING AN ESD PROTECTED AREA.'

Notice

These signs are not supplied with hanging holes.
