

ESD Warning Signs

TECHNICAL DATASHEET

S315 R/RF, S630R

Description

A simple yet effective way of reminding everyone of the problems and related procedures required to help eliminate ESD. Help workers stay informed of the static grounding policies at your facility with ESD warning signs. These signs are designed for the attention of entering an ESD Protected Area. An essential sign for chemical storage and electrical areas. Warning signs are available in rigid or flexible material with self-adhesive backing. The signs are printed in red and white as standard. These signs do not have any ESD properties and are therefore to be used outside of the EPA (EPA's entrance door, for example).

ATTENTION

You are now Leaving An
ESD PROTECTED AREA
All Static Sensitive Items
Must Be In Suitable Protective
Packaging
