

ESD Classic Bench

TECHNICAL DATASHEET

Customisable

Description

ESD Classic Benches are simple, functional and inexpensive. They can be placed in a line with no gaps for conveyor work. Universal design allows fitting out the workplace with necessary equipment and drawer units. The surfaces of these desks are made of ESD Laminate which is highly resistant to abrasion. They are specially designed to be used in electrostatic protected areas. Full range of accessories and options available. Bespoke workbenches can be made on request.
