

# ESD Turntables

## TECHNICAL DATASHEET

TTB390

### Description

ESD Turntables for use on large or heavy products or assemblies on the workbench. The need to lift the product is taken away when working on a GYRO-STAT static safe turntable. Bondline's ESD turntables are 100% safe to use in an electrostatic protected area (EPA). They are ideal for use within the electronic assembly industry, but can also be used in any other industry. This range of ESD safe conductive GYRO-STAT turntables are designed and manufactured in the UK. A manual lock prevents spinning temporarily if required.

### Features

- Available in 3 different surfaces.
- Made in the UK.
- Can withstand 100KG (UDL) and will prevent injuries caused by lifting heavy equipment. One of the three manual screw locks prevents spinning in any position.
- Very low profile – only 14mm thick.
- Connected to ground via work bench or mat.
- Lockable in any positions with one of three thumbscrews.
- Volume resistance  $10^{(7)}-10^{(9)}$ . High quality conductive lubricated low resistance bearings.
- CE, RoHS and REACH compliant.
- Compliant according to IEC-61340-1-5 International Standard.

Natural stainless steel

Grey rubber

Blue rubber

Compliant according to IEC-61340-1-5 International Standard

Manufactured in the United Kingdom
