

ESD KSHB Workbench

ESD-KSHB-Workbench

Description

The ESD KSHB Workbench is a durable, cost-effective workbench with one shelf and a pair of uprights. It is suitable for most industrial tasks and environments including: packing, testing, repairing and inspecting. The ESD KSHB Workbench can be customised with a wide range of accessories and add-ons, covering the essential basic needs of any professional workstation. The height of the ESD KSHB Workbench can be easily adjusted with an Allen key from 650 to 900mm. The height adjustment of the ESD laminate shelf is between 1080-1550 mm. The load capacity for the bench top is 300kg max and for the shelf 50kg even load. The bench's top is a light grey laminate surface which is semi-conductive (ESD) with a grey edging and 25mm thickness. Compliant to IEC-61340-1-5 International Standard.

Compliant according to IEC-61340-1-5 International Standard
