

ESD KSTPB Workbench

ESD-KSTPB-Workbench

Description

The ESD KSTPB Workbench is a durable, conductive industrial workbench that is suitable for Electrostatic Protected Areas. It is the ideal basic bench for a broad range of tasks and environments when fitted with accessories: packing, inspecting, testing, repairing. The KSTPB Workbench can be easily customised with a wide range of accessories and add-ons to suit your own requirements. It is the most cost-effective option in our range of ESD workbenches. The bench's top is made from a semi-conductive laminate with a thickness of 25mm. The bench's height can easily be adjusted from 650 to 900mm, which makes the benches suitable for work while standing or sitting. It has a max loading capacity of 300kg and is guaranteed for regular use. Compliant to IEC-61340-1-5 International Standard.

Compliant according to IEC-61340-1-5 International Standard
