

# ESD LED Magnifying Lamp – Long Reach

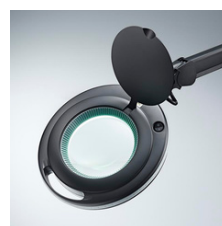

BTL2

## Description

This energy-efficient ESD LED Magnifying Lamp has a maximum reach of 1180mm with a heavy metal table clamp for stability and safe field of view. It is a professional LED daylight magnifier lamp with a glass lens suitable for industrial applications. The lamp's long reach arms and sturdy joints provides complete flexibility and is especially welcome when working with circuit boards and similar delicate objects. The lamp is supplied with x3 dioptr lens as standard, optional x5 dioptr lens. ESD safe for use in Electrostatic Protected Areas.

## Technical Details

- ESD safe (suitable for use in Electrostatic Protected Areas)
- Ergonomic and professional
- 60 white LED bulbs, only 8w in total
- 3 dioptr (1.75x magnification)
- Can easily be replaced with x5 dioptr (2.25x mag.) (NOT ESD)
- Energy efficient
- Quality 125mm (5")
- Bulbs never need replacing
- Shadow-free, cool light
- Built-in handle and sun protector cap
- Glass lens
- Suitable for industrial applications
- Long reach arms with maximum reach of 1180mm
- Sturdy joints
- Includes heavy metal table clamp with up to 65mm clamping capacity
- Ideal for close-up intricate tasks
- Black ESD version
- Meets the requirements of IEC 61340-5-1 International Standard
- Compliant to CE, RoHS and REACH standards

**Sun protector cap**

### Rotating Head

- The lamp head can be rotated up and down, from left to right
- Vertical angle 200°
- Circular angle 200°

### Swing Arm

- Adjustable swing arm, allowing light to be positioned exactly, where it's needed
- Maximum length of the arm – 1180mm

### Metal Table Clamp

- Very heavy metal table clamp for stability and safe field of view
- The clamp-lock-system stays firmly in one piece and can be easily clamped onto a table

### Single Dimming

- Single light, warm white or cool white are available

## Standards & Regulations Met:

RoHS compliant

European Conformity

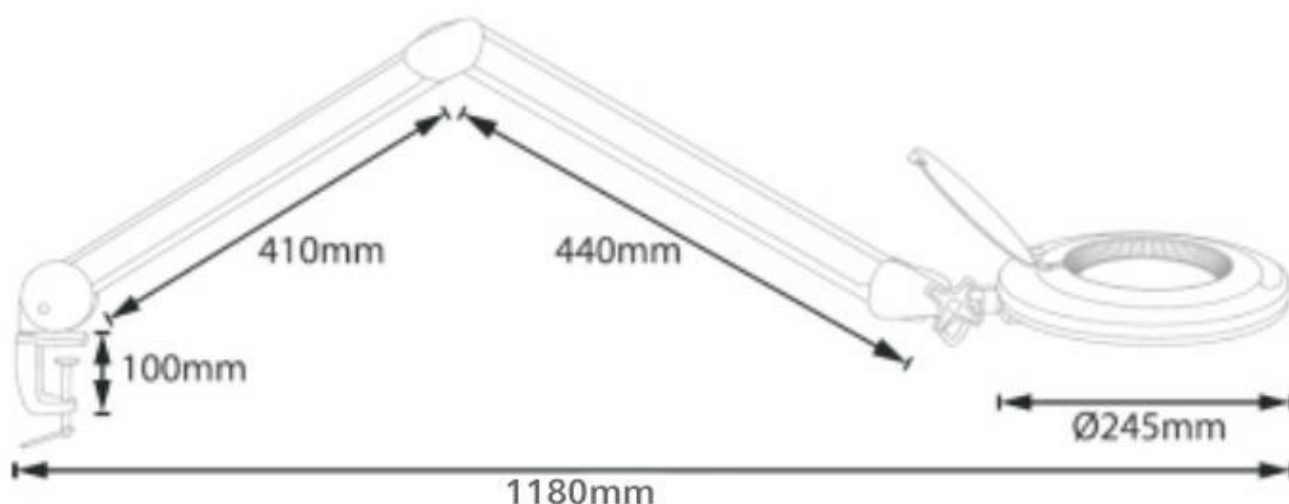

REACH compliant

IEC 61340-5-1
